## Health Benefit Guidance Employees Trust

Choosing the best-value health plan is complicated. MyHealthMath makes it easy with **Decision Doc**—an interactive, personalized platform with human support.

1. Go through a series of questions about your specific medical needs.

How well did your healthcare cover your needs last year?

- Great! My insurance covered all of my expenses
- It Was Tight Healthcare costs stretched my budget
- In the Red Healthcare costs put me at financial risk
- I'd Rather Not Say I don't want to share this information right now

Keep this information or delete as you think about your healthcare needs for 2021.

← Back Save & Continue →

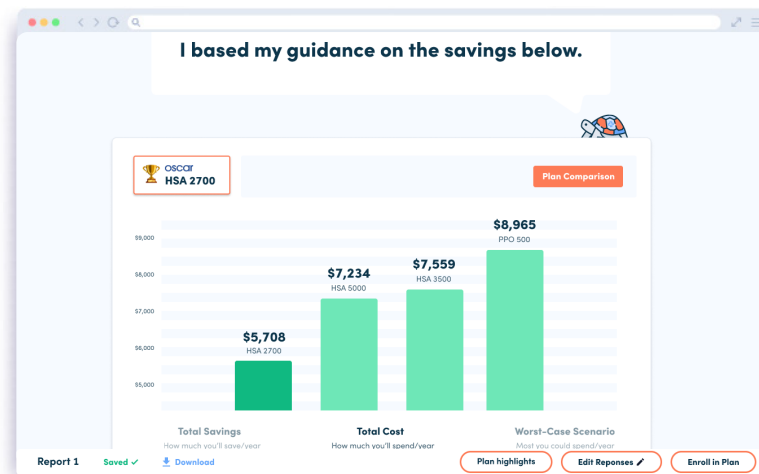

Here are some common health events. Do any of these apply to you or your household?

Add as many as you need.

- Specialists Visits or Special Health Consults See Details
- Pregnancy or Fertility Treatment See Details
- Surgery or Hospital Visits See Details
- X-Rays, Imaging, Lab Tests See Details
- I Don't Need These Types of Health Care See Details

These services can affect your costs depending on your plan. It's best to consult with your health plan guidance.

2. Receive an interactive report showing which health plan will save you the most money.

3. Save and print your report, edit it in real time, and then click to navigate to enrollment platform.

**Live analysts** are available at every step, from walking employees through the questions to analyzing their reports.
